Ahmedabad, India | 6354921104 | priyanshvekariya08@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Detail-oriented Data Analyst with hands-on expertise in Python, SQL, and Power BI. Skilled at building end-to-end Power BI dashboards using star-schema data models, Power Query, and advanced DAX to convert raw data into actionable business insights. Strong foundation in database management, backend web development, and problem-solving, seeking a Data Analyst internship to drive data-informed decisions.

TECHNICAL SKILLS

- Languages & Tools: Python, SQL, Power BI, Power Query, DAX, HTML/CSS, Flask
- Core Competencies: Data Analysis & Visualization, Database Management, Debugging, Problem Solving, Front-End Development, Backend Web Development

PROJECTS

HackHub – Hackathon Management Platform | Python, Flask, PostgreSQL, SQLAlchemy, QR Code Integration

Project Link: [Tech-Wizards-1331/HackHub](#)

- Built HackHub, a full-stack hackathon management platform using Flask and PostgreSQL for team registration, participant tracking, and event administration.
- Implemented a QR code-based check-in system for fast, contactless attendance verification.
- Designed a team management module with database migrations and secure multi-user session handling.

Financial Performance Dashboard | Power BI, Power Query, DAX, Star Schema

Project Link: [Financial Performance Dashboard](#)

- Engineered an end-to-end Financial Performance Dashboard in Power BI using a star-schema data model to analyze sales, profit, customer, and product performance.
- Built advanced DAX measures and Power Query transformations to surface key financial metrics.
- Designed an interactive 4-page dashboard with KPI cards, drill-through analysis, and dynamic filters, optimized for mobile viewing.

PhonePe Payment Insights Dashboard | Power BI, Power Query, DAX

Project Link: [priyansh0712/RW - PowerBi/PhonePay](#)

- Analyzed 10,000+ PhonePe transaction records using Power BI to track total transactions, transaction value, unique users, and success rate.
- Built an interactive dashboard covering transaction trends, age segment contribution, service-wise transaction value, and weekday vs. weekend usage patterns.
- Designed dynamic, DAX-driven insight cards that auto-generate text callouts highlighting peak transaction periods and top-performing services.

EDUCATION

L.J. Institute of Engineering and Technology
B.E. in Computer Science and Engineering

Expected 2028

CERTIFICATIONS

- Exploratory Data Analysis for Machine Learning — IBM
- Advanced Relational Database and SQL — Coursera
- The Ultimate Data Science — CWH
